tel +1-240-334-2580

Reference 18-999/SMA-098 lth

Subject Meeting Announcement
Global Aircraft Tracking (GAT) Working Group

Chairman Chuck Adler, Boeing (Charles.O.Adler@Boeing.com)

Host Gables Engineering

When February 4-6, 2019
February 4-6, from 0900 to 1700 each day (Monday-Wednesday)
Note: The SAI Subcommittee will meet February 7-8 at the same location. Refer to 18-999/SMA-099 for details.

Where Meeting Location
Gables Engineering
247 Greco Avenue
Coral Gables, Florida 33146
Point of Contact
Anna A. Franklin
Business Development Administrator
tel: 1-305-774-4327
email: franklin@gableseng.com

Hotels There are many hotels near Gables Engineering to meet your budget and comfort needs. A list is attached to this meeting announcement.

Instructions Please notify ARINC Industry Activities of your intention to attend by registering online at: <http://www.aviation-ia.com/events/>
The meeting is open to all interested parties. Individuals requesting time on the agenda should contact Chuck Adler or Peter Grau. Material intended to be circulated prior to the meeting should be submitted before **January 29, 2019**. The agenda will be finalized one week prior to the meeting.

Activity Scope

The goal of the GAT Working Group is to prepare standards applicable to the ICAO Global Aeronautical Distress and Safety System (GADSS). These are intended to positively identify and track an aircraft with minimal impact on new production aircraft as well as legacy aircraft retrofit.

Meeting Objectives

Global Aircraft Tracking Standards

The Global Aircraft Tracking (GAT) Working Group will prepare standards applicable to the ICAO Global Aeronautical Distress and Safety System (GADSS). The APIMs are as follows:

- APIM 17-004 – Autonomous Distress Tracking (ADT)
- APIM 17-005 – Timely Recovery of Flight Data (TRFD)

ICAO SARPS will require GADSS on certain production aircraft with a gross weight greater than 27,000 kg. The equipment will provide:

- Aircraft Tracking – All flight phases – 15-minute interval
- Autonomous Distress Tracking – High data rates

Several technologies may contribute to positive aircraft tracking. This includes ground-based and space-based ADS-B, satcom, VHF datalink, ELT-DT, and mixed technologies.

Autonomous Distress Tracking (ADT)

ARINC Project Paper 680: *Autonomous Distress Tracking (ADT)* is being prepared in response to APIM 17-004. The document will describe GADSS requirements, equipment architectures, and aircraft interface requirements. The goal is to prepare a mature document for AEEC adoption consideration at the upcoming AEEC General Session to be held in Prague.

Timely Recovery of Flight Data (TRFD)

Per APIM 17-005, the GAT Working Group will prepare ARINC Project Paper 681 describing system requirements, equipment architectures, and aircraft interface installation requirements for equipment capable of meeting ICAO TRFD requirements, potentially including:

- Automatic Deployable Flight Recorder (ADFR) installed on the aircraft which is capable of automatically deploying from the aircraft
- Flight Data Streaming (FDS) – the ability to stream flight data from the airplane while in flight
- Airlines are expected to benefit by being able to meet the forthcoming worldwide TRFD mandates in the most effective manner possible.

Travel Information

Gables Engineering is located about 15 minutes South of the Miami International Airport (MIA). Directions to Gables are provided for you as well as a link that takes you to Google maps so you can get directions to your hotel from the Miami International Airport.

From Miami Airport Rental Car Facility

1. Exit on 12th street 0.2 mi
2. Follow signs to Route 953 south, Le Jeune Rd 3.8 mi

3. Turn left onto Bird Avenue 0.2 mi
4. Turn right onto Ponce De Leon Blvd 0.3 mi
5. At the traffic circle, use 1st exit onto Greco Ave
6. Gables Engineering is on the right
7. Visitors parking through the gate, rear of building
