ARINC CSS

Action Item #	Who	What	When	Status
CSS-01	Panasonic, Thales, Lumexis, Boeing, Zodiac, Delta	Review Airbus proposal for developing an ARINC Report to define requirements and guidelines for Seat Production Testing prior to delivery to OEMs or Airlines	10/1/2014	New

ARINC 485 Part 1

Action Item #	Who	What	When	Status
485-P1-12	IA	Develop coordination draft 2 for distribution	8/31/2014	New

ARINC 485 Part 2

Action Item #	Who	What	When	Status
485-P2-17	Panasonic	Revise message sequence diagrams E-1 through 3 to add a note for the ECU option to soft boot after completion of self test and data reporting	8/31/2014	New
485-P2-18	IA	Develop coordination draft 2 for distribution	8/31/2014	New

628 P1

Action Item #	Who	What	When	Status
628 P1-190	Boeing - L. Paterson, IA	LP - Update Figure 18-7 in Attachment 18, and IA - Update Figures 18-6 and 18-5 to show new colors for ethernet cabling	9/15/2014	New
628 P1-191	IA	Revise figure 18-2 to make pin 4 = yellow, pin 5 = red, pin 9 = blue and pin 10 = green. Update table to reflect new wording to replace "daisy chain" and "back to tapping unit"	9/15/2014	New
628 P1-192	IA	Revise Attachment 18 to incorporate changes to the wiring to the DOM based on the changes made to the wiring to the CWAP in section 17.0	9/15/2014	New
628 P1-193	IA	Revert section 16.3 to the version in draft 6.	9/15/2014	New
628 P1-194	IA	Revise figure 17-1 to remove colors from the ethernet interconnects	9/15/2014	New
628 P1-195	IA	Incorporate revised figures and tables for CWAP connector pin assignments	9/15/2014	New

Action Item #	Who	What	When	Status
A800P2-65	Amphenol	Provide graphic for the 30-23 insert for inclusion into figure 4-1b for a future supplement	10/1/2014	Open

CSS Action Items - Menlo Park - November 11-13, 2014

ARINC CSS				
A800P2-69	TEC/Amphenol	Revise Figure submitted for A800P2-64 to revise the reference datum of the fixation groove to the front surface of the flange for the receptacle.	7/7/2014	Open
A800P2-70	TEC	Revise note 3 on drawing A-7a submitted for 16-02 insert that dimensions the GbE pin radius to remove references to Deutsch and TE PN. Remove reference to GbE pins in note 3 and refer to the pin as a 24 ga pin. Also remove TE Trademark on connector isometric drawing. Revise Note 4 to remove crimp tool reference and add note saying to terminate per manufacturer instructions. Add definition of mating interface for the 24 ga. socket and contact overlap. Revise notes in the socket insert drawings as noted above.	7/7/2014	Open
A800P2-71	Thales - K. Brady	Add additional requirements for the dielectric diameter range for wire types 22-24 and 26 AWG used for data interconnect on the 30-23 insert	10/1/2014	Open
A800P2-72	Thales - K. Brady	Verify voltage range, dielectric maximum voltage and current maximum specified in row 26, 28 and 32 of requirements matrix for 30-23 insert	10/1/2014	Open
A800P2-74	Thales - K. Brady	Provide justification for inclusion of the 30-23 insert in A800P2 at the next meeting	10/1/2014	New
